Alternative Careers in Science and Engineering Seminar Series

- While university career tools and advice abound for undergraduate and master’s students, there are limited resources available specifically for PhD students.

- We are a student-run organization whose mission is to educate you as PhD students about career options and give you first-hand information about career paths that you may be interested in.

- PhD students come from many different backgrounds, and with very transferable skills they are hired in a wide variety of industries.

- We are funded by the USC Graduate and Professional Student Senate (GPSS).

**Past seminars include:**

+ Consulting Careers
+ Pharmaceutical Industry Careers
+ Administrative Careers
+ Post-Doctoral Education

Faculty Advisor:
Professor Jason Kutch
(Division of Biokinesiology and Physical Therapy)

Board members:
Josh Inouye, President (Biomedical Engineering)
